

Way Past Bedtime

Way past the sun going down and the cows coming home
The evening bells have long since chimed
Even the moon and stars and the birds are all in bed
It's way past bedtime

Wyatt and Blake so sleepy and serene
You can close your eyes and dream your favorite dreams
Lay down your head rest your heart next to mine and go to sleep
Because it's way past bedtime

See how the church and the school and the houses in the town
Are twinkling in the night skyline
High on the hill all the sheep that we counted in the sky
They know it's way past bedtime

That pale yellow moon and all the stars above
Are twinkling in your eyes and dusting their stardust
Lay down your head rest your heart next to mine and go to sleep
Because it's way past
You know it's way past
It's way past bedtime
